PROTECTING YOUR HEALTH SINCE 1991

1991 company foundation CERVA

1996 joint venture in Slovakia

2006 a foreign shareholder – an international vendor of safety equipment – entered our company

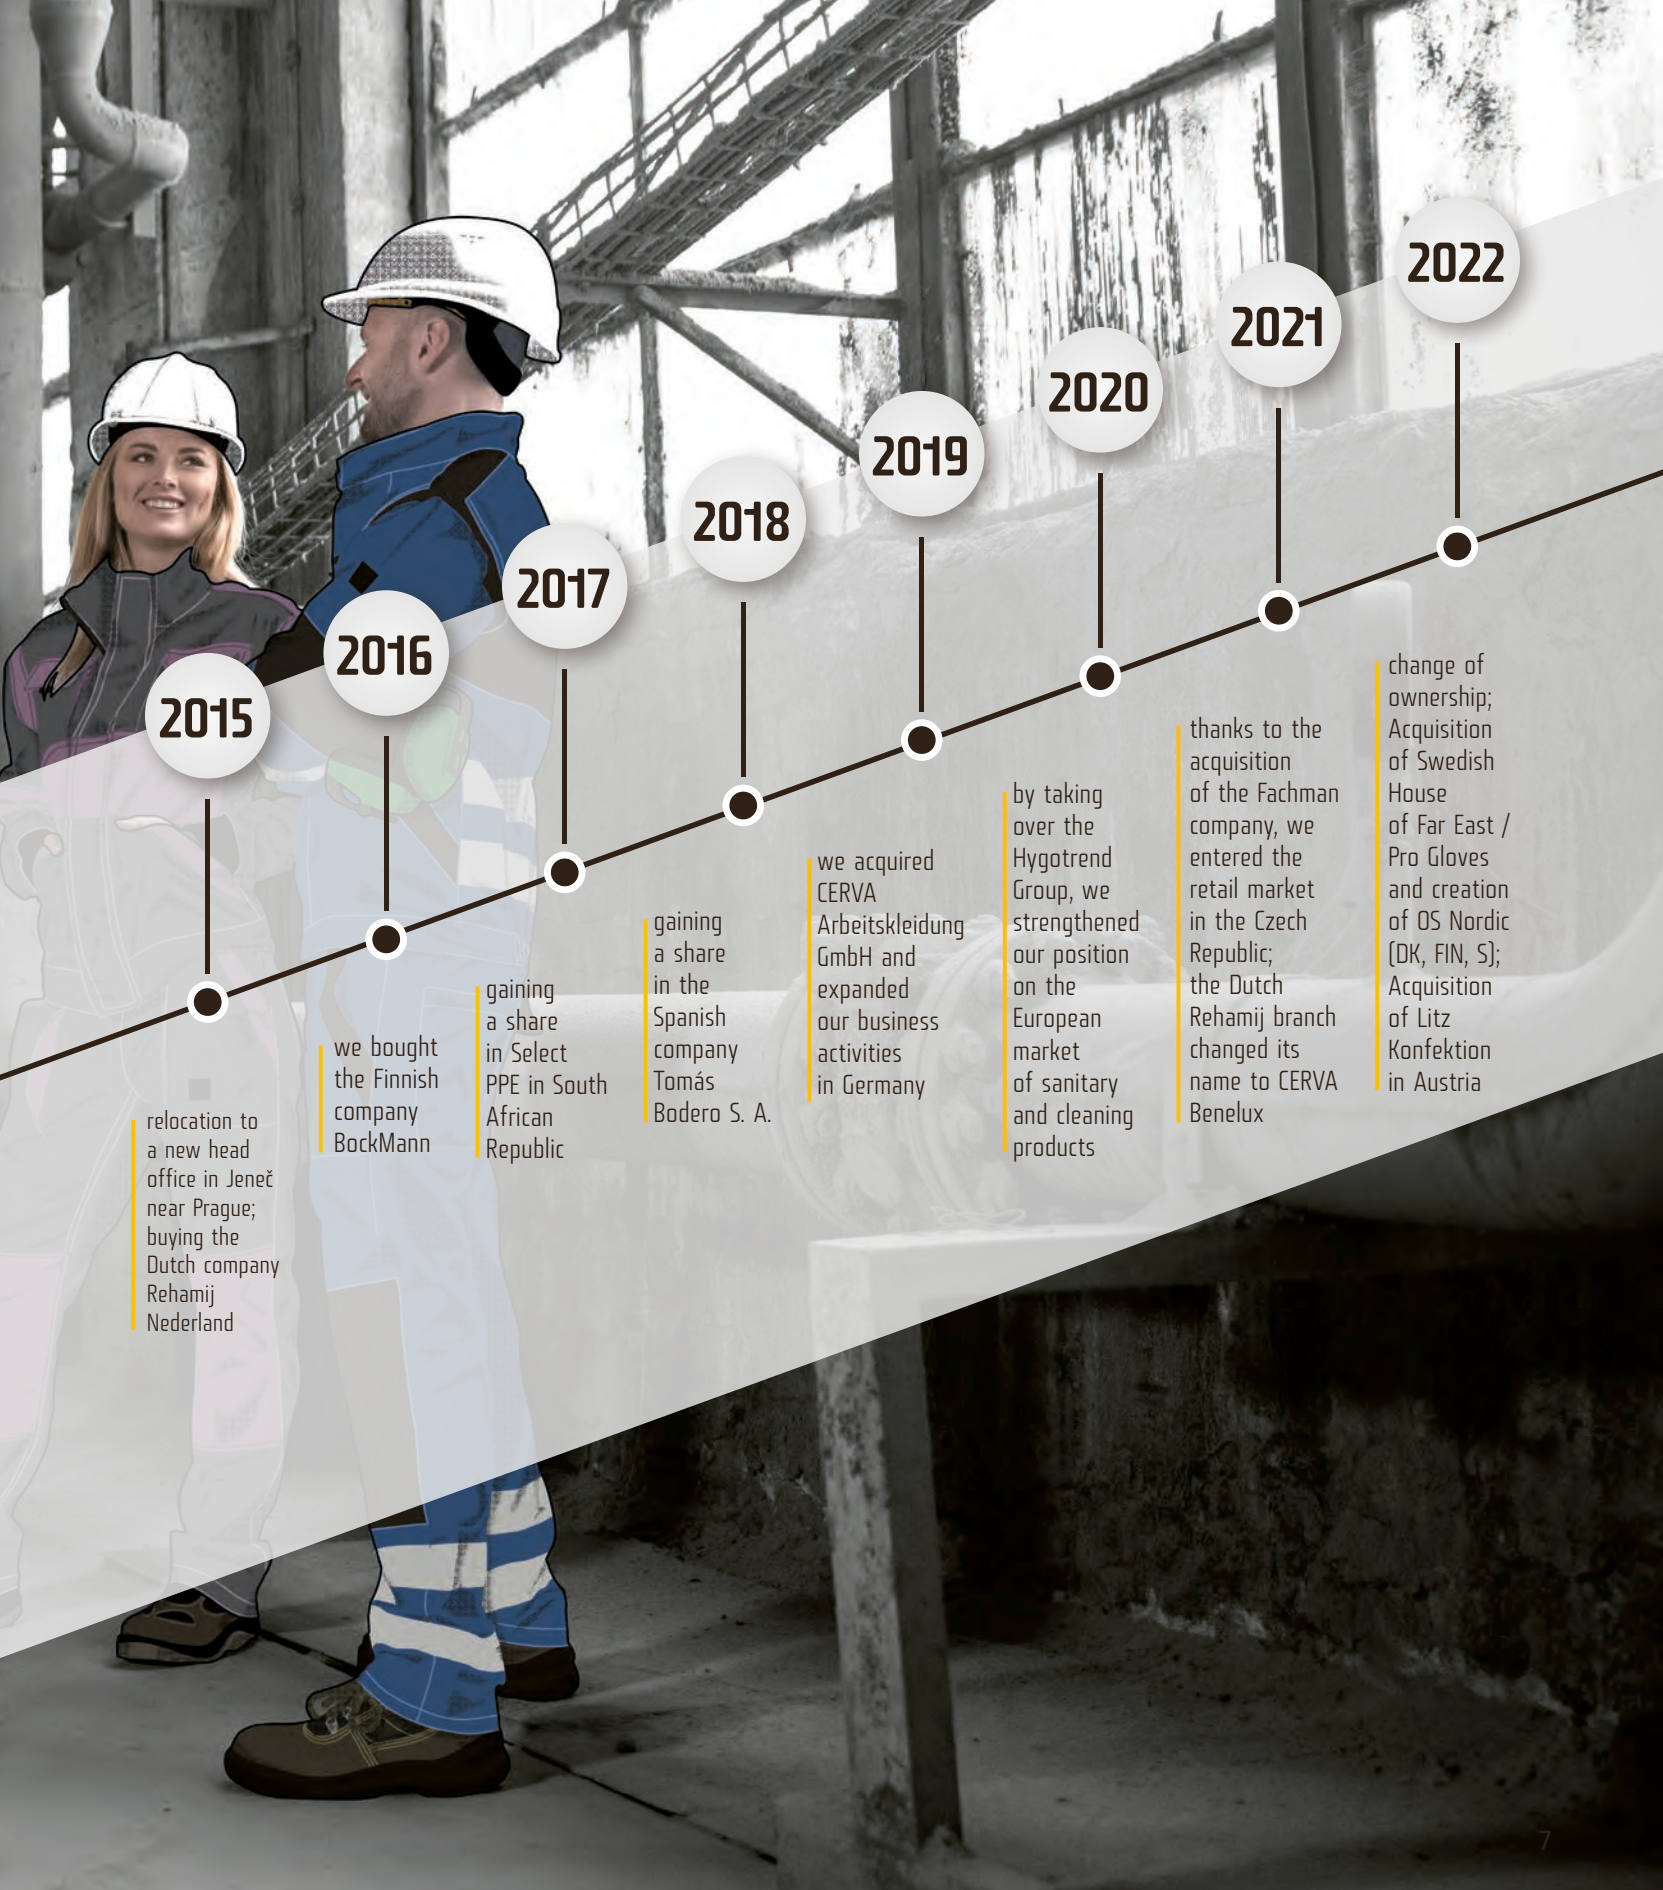
2008 company's new head office in Hostivice; we bought the Italian brand Panda and the Hungarian brand Vektor

2009 we introduced a private label; we opened our first Shop in Shop store

2010 we entered the Romanian market, where the new branch CERVA ROMANIA SRL was founded; CERVA MAGYARORSZÁG was founded in Hungary

2012 CERVA Polska branch was founded in Poland

2013 we entered the Turkish and Danish markets, where new branches CERVA Turkey Is Güvenli and Otto Schachner were founded



2015

relocation to a new head office in Jeneč near Prague; buying the Dutch company Rehamij Nederland

2016

we bought the Finnish company BockMann

2017

gaining a share in Select PPE in South African Republic

2018

gaining a share in the Spanish company Tomás Bodero S. A.

2019

we acquired CERVA Arbeitskleidung GmbH and expanded our business activities in Germany

2020

by taking over the Hygotrend Group, we strengthened our position on the European market of sanitary and cleaning products

2021

thanks to the acquisition of the Fachman company, we entered the retail market in the Czech Republic; the Dutch Rehamij branch changed its name to CERVA Benelux

2022

change of ownership; Acquisition of Swedish House of Far East / Pro Gloves and creation of OS Nordic (DK, FIN, S); Acquisition of Litz Konfektion in Austria

Size tables are only a tentative tool for choosing the right size and it is not possible to claim the goods on the basis of these size tables. In the case your size is somewhere between two sizes, always select a larger size. Work clothes, shoes and other protective equipment is designed for all-day wear and should be maximum comfortable.

CUTS

WE KNOW THAT EVERY PERSON IS DIFFERENT AND PREFERS A DIFFERENT CUT. THAT IS WHY THERE ARE TROUSERS IN 4 DIFFERENT CUTS IN OUR PORTFOLIO FROM WHICH EVERYONE CAN CHOOSE.

STANDARD

- Straight cut with high waist
- The trouser leg is straight from the thigh to the lower circumference
- Suitable for all body types of figures

RELAX

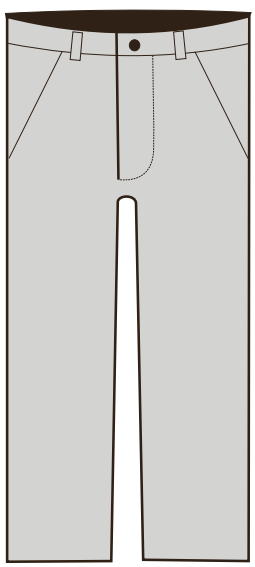
- Cut with slightly lower waist
- The trouser leg is slightly tapered from the thigh to the knee
- Lower leg circumference corresponds to the width of the knee circumference
- Suitable for all body types of figures

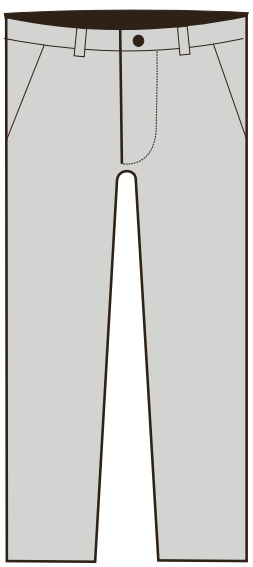
REGULAR

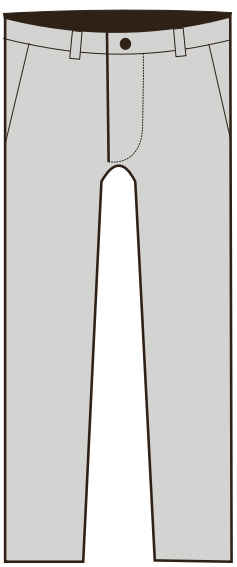
- Cut with lower waist
- The trouser leg is tapered from the thigh to the knee and to the lower circumference
- The trouser leg has a cone shape
- The material containing of elastic fibre allows free movement and high comfort even with narrow legs
- A very popular cut that suits almost everyone

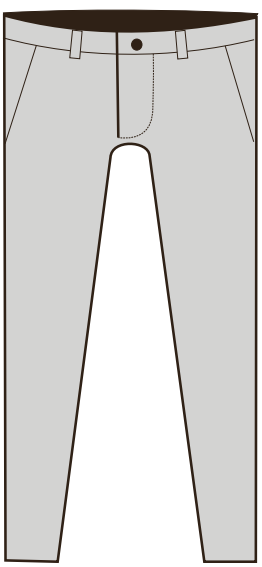
SLIM

- Cut with low waist and slim leg shape
- Made from a material with a high content of elastic fibre, the trousers are very comfortable and without any restrictions of movement
- Cut for everyone who prefers a modern and youthful look





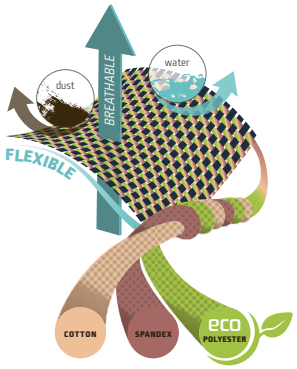




MATERIALS

THE OVERVIEW OF UNIQUE MATERIALS DEVELOPED FOR CERVA GARMENTS

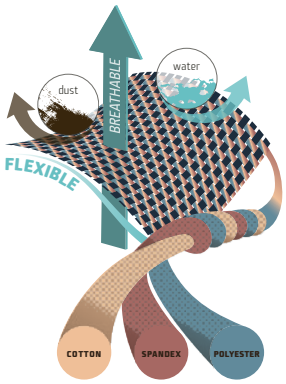
Trifibetexeco®



TrifibetexECO® is an innovative textile material that is environmentally friendly. It consists of three fibers - 65% recycled polyester, 32% cotton and 3% spandex.

This combination ensures comfort and free movement, breathability, resistance to dirt and size and shape stability. Recycled polyester is made from PET bottles, discarded polyester clothing or old fishing nets that would otherwise just pollute the ocean. During its production, significantly less water and energy are consumed, and the resulting material has up to 39% lower carbon footprint than polyester produced in the traditional way from petroleum derivatives. The properties of both materials, such as strength, non-creasing, durability, shape stabilty and quick drying, are comparable.

Trifibetex®



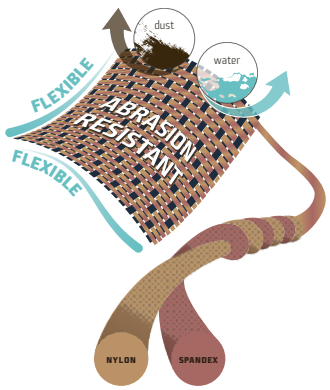
Trifibetex® is a unique blend of 3 kinds of fibre – cotton, polyester and elastic fibre Spandex. This combination ensures maximum comfort and flexibility during any work while maintaining functionality.

The largest content of natural cotton fibre (62%) gives the fabric a very pleasant feel to the touch, high breathability and excellent absorbency. Thanks to polyester (35% content), the strength of the fabric is increased, moreover, it gives the material low shrinkage and creasing, shape stability, dirt resistance, and on the whole, it increases the product's durability when frequently washed. Spandex (3% content in width) adds a great feature to the material – stretching up to twice its length under tension and then returning to its original length thanks to the shape memory.

The combination of cotton, polyester and Spandex, the strongest CANVAS weave and the ideal thread count gives the **Trifibetex®** material the best properties: strength, breathability, colour fastness, absorbency, elasticity, dirt resistance.

High wearing comfort and high comfort in contact with skin. The unique **Trifibetex®** material meets the demanding requirements for high wearing comfort, easy maintenance and long product life and, thanks to its high cotton content, also for ecology, too.

TrifibetexPRO®



TrifibetexPRO® – another textile material from our range that feels exceptional to wear.

By combining Nylon and Spandex fibres, we have used the best of both worlds. 90% nylon fibre content guarantees high strength of the fabric when both dry and wet, high abrasion resistance, high elasticity, easy maintenance and resistance against chemical agents and alkalis. One of the important properties of nylon fibre is its strength which increases as the fibre heats. This ensures higher temperature resistance.

Another characteristic property of the **TrifibetexPRO®** fibre is its cool and pleasant feel.

10% Spandex elastic fibre content in the warp and weft gives the **TrifibetexPRO®** its unique elasticity. Spandex fibre in the fabric ensures elongation under tension to up to twice its length and immediate return to the original length when the tension is released. The fabric maintains its shape stability and gives **TrifibetexPRO®** the utmost utility properties.

What also makes the **TrifibetexPRO®** unique is the twill weave, the structure of which guarantees the strength, elasticity and durability of the fabric. **TrifibetexPRO®** can also be called 4-way stretch.

LUMICOTEX®

The combination of 50% cotton and 50% polyester ensures excellent breathability for work in hot climate conditions.

The low material weight enhances comfort. Moreover, the used twill-weave technology increases the overall strength of the fabric. In addition to the basic combination of HI-VIS yellow and orange colours, the collection also offers the combination of HI-VIS and dark blue colours.

The top HI-VIS line of CIUDADES garments collection fulfils safety classification # 1 and # 2 according to EN ISO 20471.

THE OVERVIEW OF OTHER MATERIALS AND TECHNOLOGIES

CORDURA® Fabric

Designed for living and built to last, the original CORDURA® fabric has proven performace in many of the world´s toughest environments with the best result in:
» durability » lightweight strength » tear and abrasion resistance

YKK®

YKK „Little Parts, Big Difference".
YKK´s products are small but provide great value for each customer.
That is the wish of the YKK Fastening Products Group. Therefore, YKK aims for „WORLD-CLASS PERFORMANCE" in terms of design, function, quality and consideration for the environment in the provided fastening products.

Global Recycled Standard ©Textil Exchange

CERVA GROUP a.s. is certified to sell GRS products. License number TE-00287101.

TAURUS: FLEECE JACKET, WINTER JACKET, SOFTSHELL VEST, SOFTSHELL JACKET
made from 100% recycled polyester.

OEKO-TEX® CONFIDENCE IN TEXTILES STANDARD 100

OEKO-TEX® STANDARD 100 is one of the world's best-known labels for textiles tested for harmful substances. It stands for customer confidence and high product safety.

TAURUS COLLECTION

NEW

Litz INDIVIDUAL WORKWEAR
MEMBER OF ČERVA GROUP

HEREWITH WE WANT TO INTRODUCE YOU OUR FIRST RECYCLING RANGE MADE OUT OF PET BOTTLES UNDER THE EXCLUSIVE BRAND TAURUS FROM LITZ FOR SUPPORTING THE ENVIRONMENT!

The first Recycling range made out of PET bottles under the exclusive brand TAURUS. Our help towards decrease of plastic usage – the TAURUS REYCLING RANGE from company LITZ.

A great step into the future! In this way we can protect the environment and reduce the production of plastic and plastic yarns. With the usage of recycling yarns made out of PET-bottles we help towards decrease of plastic waste. Buying a product of the TAURUS range shows environmental awareness and sustainability for our Earth.

Our new product range will always be completed with a recycling yarn range. In this way we move closer to the aim and can produce the first models integrated out of recycling materials until 2022!

OUR ATTITUDE TOWARDS LIFE

To take the requirements to our ENVIRONMENT seriously every day and to contribute thinkgreen

THINK GREEN

OUR SPECIFICATIONS

» Change of the complete LITZ model ranges to Recycling materials up to the year 2022
» Current improvement of the customer's service & reaction time
» New developments in Design & Cut keeping the company's concept always in a way of our customer demands

KNOXFIELD COLLECTION FACELIFT – NEW LINES

A COLLECTION THAT FITS YOU ANYTIME, ANYWHERE, IN ANY CLIMATE CONDITIONS

CERVA presents functional and modern clothing that fits. Individual pieces that match, while meeting the requirements for hi-vis equipment. Such was the idea of the designer Tomáš Hybler, while thinking about the new timeless look. The result is the unique Knoxfield collection and its many different combinations of clothing.

The Knoxfield workwear collection offers, for example, trousers, sweatshirts, shorts and softshell jackets. You can pick a colour combination that suits you and a whole matching outfit. This way, you can easily equip your entire factory with uniformed clothing that looks great, is comfortable to wear and fits perfectly. Moreover, you can use a lot of different accessories enhancing the garment functionality.

Most of the products in the Knoxfield collection come in two lines:

1. classic RYO (Red, Yellow, Orange) workwear that newly features triple colours stitching that makes it more attractive and stylish
2. new HI-VIS line that meets EN 20471 standard with full length reflective printed stripes (HVPS - High Visibility Printed Stripes)

Knoxfield clothing is suitable for most common outdoor and indoor work environments - roads, highways, railways, warehouses, or construction sites.

Explore the collection with its various colour combinations (fluorescent yellow, orange or unique red), original cuts and smartly placed reflective piping, new printed stripes and edging. All models of trousers have a specially designed elastic waistband, which will make you feel comfortable all day long. Your knees will remain protected due to special knee pads inserts.

New KNOXFIELD lines bring you comfort, safety and durability.

NEW

RESULTS OF THE VISIBILITY CLASSES ACCORDING TO EN ISO 20471

The total area of reflective and high-visibility materials on the combination of trousers and upper part of the garment meets the requirements for the area size of these materials according to EN ISO 20471 and the class indicated in the chart.

NEURUM COLLECTION

A DESIGN COLLECTION THAT GOES FAR BEYOND TRADITIONAL WORKWEAR

When designing our apparel, we prioritise not only the usefulness and practicality of the clothing but we aim to look further and give you, our customers, an attractive design and a comfortable fit.

Fortunately, we did not have to look long for the inspiration to create the **NEURUM** collection. All we had to do was to look around and everything was suddenly clear. Then we set a goal and started working on the style, cut and accessories of the gradually emerging collection. The clear result of our concentrated efforts was the collection of work clothes for self-confident men who want to look sexy and attractive even while working.

These properties and the masculine appearance are underlined by sharp lines and the fit of all types of clothing for the upper body. Our work jacket, a light jacket and a winter parka form a harmonious unit.

What makes our NEURUM collection so unique:

- **Lowered waist and slim fit** of the NEURUM pants that enhance the overall modern and young look of the whole collection.
- **Flexible waist** that ensures that the pants fit you perfectly whether you work standing up or sitting down.
- **Unique hood highlighting the unique design** that pushes the NEURUM collection beyond traditional workwear.
- **Practical pockets and now so-important badge loop** which are an indispensable part of the pants.
- Accessories consisting of a **designer tool bag, a waist bag, a cap, socks and belts**, are an essential part of the collection.

However, the **NEURUM** collection offers more than an attractive and eye-catching design and fit.

From the moment we got the idea and started to shape the **NEURUM** collection, it was clear to us that the unique design must be complemented by new sophisticated materials that would top off the attractive look of the collection.

That is why we developed unique materials – **Trifibetex®** and **TrifibetexPRO®**. These materials and the design are the building stones of the workwear portion of the **NEURUM** collection.

The classic line in the **NEURUM** collection is made using the **Trifibetex®** material, and **TrifibetexPRO®** forms the base for our performance pants and is also used in our workwear jackets.

However, since we saw room and felt the need to bring the **NEURUM** collection to perfection, we came up with another idea – camouflage. We created our own design for the camouflage all-over-print specific by its geometrical appearance.

Last but not least, the **NEURUM** collection was also inspired by the classic denim jacket as we all know it, and that is why the last collection line features a denim jacket, pants and shorts.

5 NEURUM collection lines:

- The **CLASSIC** line made of the unique material Trifibetex® meets the demanding requirements for work clothes.
- The **PEFORMANCE** line is unique for the use of TrifibetexPRO® on the pants and stressed parts of the jackets.
- The **CAMOUFLAGE** line made of Trifibetex® features a distinctive geometric camouflage pattern in several colors.
- The **DENIM** line is inspired by denim fashion and consists of pants, shorts, and a jacket.
- The **WINTER** line offers a wide range of stylish padded jackets and bodywarmers, hoodies and wind jackets.

The overall concept and composition of the individual parts of the NEURUM collection make it timeless not only in terms of its useful properties, but also in terms of its modern appearance and maximum wearing comfort.

NEURUM

CLASSIC
LINE

The CLASSIC line of the NEURUM collection made of Trifibetex® meets the strictest demands on workwear.

The CLASSIC line comes in 4 attractive colours: dark olive, navy, petrol blue and anthracite.

You can choose from shorts, 3/4 pants or full-length pants depending on the weather or your needs. All of them are made from the unique Trifibetex® material with CORDURA® fabric reinforcement of the knee parts.

The stylish working jacket comes in two versions – with zipper or with snap fasteners and a hood.

The CLASSIC line can be complemented with a T-shirt, cap, backpack or waist bag in the same colour. You can add a light softshell jacket or a winter jacket that will keep you warm on your everyday job

CAMOUFLAGE
LINE

The CAMOUFLAGE line with its own characteristic design featuring geometrical shapes.

The CAMOUFLAGE line comes in 4 attractive colours: dark olive, navy, petrol blue and anthracite.

You can choose from shorts or full-length pants depending on the weather or your needs. All of them are made from the unique Trifibetex® material with CORDURA® fabric reinforcement on the knee parts.

The stylish working jacket comes in two versions – with zipper or with snap fasteners and a hood.

The CAMOUFLAGE line can be complemented with a T-shirt, cap, backpack or waist bag in the same colour. A light softshell jacket or a winter jacket will keep you warm on your everyday job.

PERFORMANCE
LINE

The performance line based on the TrifibetexPRO® used for performance pants and, as an additional material, in extremely stressed parts of workwear jackets.

The PERFORMANCE line comes in 4 attractive colours: dark olive, navy, petrol blue and anthracite.

You can choose from shorts, ¾ pants or full-length pants depending on the weather or your needs. All of them are made from the unique TrifibetexPRO® material with CORDURA® fabric reinforcement on the knee parts.

The whole PERFORMANCE line can be complemented with one of the jackets from the CLASSIC line or with a T-shirt, cap, backpack or waist bag in the same colour.

DENIM
LINE

The denim line inspired by the classic denim jacket consists of a denim jacket, pants and shorts.

The DENIM line comes in navy colour and is made of a very comfortable material that consists of 97% cotton, 3% Elastane, combined with Trifibetex® and CORDURA® fabric reinforcement on the knee parts and on the most stressed parts for greater durability.

The DENIM line can be combined with a T-shirt, cap, backpack or waist bag from the NEURUM collection.

DAYBORO COLLECTION

A COLLECTION IN A MODERN CUT, COMBINING FUNCTION AND COMFORT

Dayboro work clothing is made of a unique TRIFIBETEX® material which combines cotton, polyester and Elastane. It provides absolute freedom of movement and maximum comfort while working on your knees or on your belly. We have added a series of useful details, such as retro-reflective details, knee pockets made of a reinforced material, phone pockets or straps for tools.

Dayboro clothing is:

» **comfortable for all-day wearing,**
» **with added retro-reflective details** in black which do not spoil the design during the day and reflect light when illuminated, thus increasing your safety,
» **sewn in a modern cut**, elegant looking with no compromise on comfort thanks to the practical seat and closing of the pants,
» **also available in a winter version** which includes a hooded jackets, softshell jacket, a winter pilot-style jacket as well as an extended length jacket (parka).

We can provide work clothing in sizes 46 – 64, accessory clothing in sizes S – 4XL. You can choose from various attractive colour combinations. You can extend the length of all pants by up to 5 cm.

The collection includes:
» Pants,
» Bib pants,
» 3/4 pants,
» Shorts,
» Jackets with a detachable hood,
» Hooded jackets,
» Softshell jackets,
» Extended winter jackets (parkas),
» Winter pilot-style jackets.

Dayboro includes a unique workwear jacket with a detachable hood.

CREMORNE COLLECTION

WORK CLOTHING TO FEEL COMFORTABLE ALL YEAR LONG

Thanks to its 60% cotton content, the collection pleasant to wear, functional and has a comfortable cut which does not limit you throughout the day. We have developed Cremorne clothing for you in a light summer version as well as in a warm winter version. It also features smart details such as an elastic waist design, D-rings or practical tool pockets.

The Cremorne Collection is:

» **pleasant to wear,** thanks to a comfortable "Relax" cut and 60% cotton content.

» **suitable for indoors as well as outdoors,** a lower weight for warmer days, a thermoinsulated collection for winter (tracksuits/hoodies can perform as a base layer under pants/jacket),

» **available in five attractive** colours with contrast edgings.

We provide Cremorne clothing in a wide range of sizes – work clothing in sizes 46–64, accessory clothing in sizes S-4XL. You can extend the leg length by up to 5 cm.

The collection includes:
» Pants,
» Bib pants,
» Shorts,
» Tracksuit,
» Jackets,
» Hoodies,
» Winter thermoinsulated pants,
» Extended winter jackets (parkas).

You can choose from white, petrol blue, navy blue, dark green and grey versions.

SHELDON COLLECTION

CERVA PRESENTS A NEW COLLECTION WITH A FANCY DESIGN AND COMFORTABLE FIT

NEW

SHELDON workwear is a stylish continuation of our best-selling EMERTON collection. It is designed in the RELAX cut to be maximally comfortable and perfectly adapt to the movement of the body during work. In addition, it captures attention with its attractive appearance. This feature unites all three lines of the SHELDON collection, i.e., basic work clothes, clothes in a camouflage pattern and HI-VIS line of clothes with printed segmented reflective stripes. The innovation of design brings more comfort, easier maintenance, and also higher resistance and extended life.

What makes the Sheldon collection special:

» sewn in a very comfortable "Relax" cut
» pleasant to wear because of its well-proven material composition and light weight
» equipped with multifunctional pockets and practical accessories
» work jackets of all lines are equipped with a special mobile phone pocket made of e-secure material, which protects against unwanted vibrations, radiation, static electricity, and bacteria
» stressed parts of selected models of work pants and jackets are reinforced with OXFORD 600D polyester

We supply the clothes of the SHELDON collection in a wide range of sizes 42–68, or XS–4XL. The leg length can be extended by 5 cm.

The collection includes:

» work waist trousers
» work shorts
» work jackets
» softshell jackets
» hoodies

CIUDADES COLLECTION

The CIUDADES workwear collection is distinguished by a unique and so comfortable fit you will not want to take the clothes off.

The clothing is made of a material that allows free movement and high comfort.

This collection is simply designed to suit almost everyone.

CIUDADES workwear collection was primarily developed for warm climate regions of South Europe, Middle East and Northern Africa. It consists of a complete range of garments available in a wide variety of colours. Its core products are produced from lightweight fabric of 195 g/m^2 composed of 65% polyester and 35% cotton.

Characteristic simple cut is typical for the collection's workwear jackets, waist and bib pants, overalls and shorts. A common element specific for this collection of garments is the noticeable pocket design. The typical "BASIC" version of the **CIUDADES** collection is available in 7 appealing colour combinations – basic black, dark blue, royal blue, green, red, white and grey.

The "REXLEX" workwear line of the **CIUDADES** garments collection, whose fit and colours are based on the "BASIC" collection, is intended for higher safety and visibility at work. It is complemented with reflective stripes on shoulders, sleeves and body parts of jackets; these reflective stripes are sewed on the lower part of legs on pants, overalls and shorts.

The top HI-VIS line of **CIUDADES** garments collection fulfils safety classification # 1 and # 2 according to EN ISO 20471. These specific workwear garments are made using light fabric composed of 50% cotton and 50% polyester in twill-weave. The high cotton content guarantees the required breathability for work in warm climate conditions.
The wearing comfort and breathability of the fabric are improved by low material weight. The used twill-weave technology increases the final fabric strength. In addition to the basic combination of HI-VIS yellow and orange colours, the collection also offers the combination of HI-VIS and dark blue, green and grey colours.

The whole collection of **CIUDADES** garments is completed with stylish T-shirts, polo-shirts, and fleece and softshell jackets.

CIUDADES workwear collection is available in 3 lines – basic, reflex and hi-vis which can be combined with each other.

The main difference is in high-visibility category and material – the Hi-Vis line is made of the unique Lumicotex material which combines cotton and polyester.

MANAGEMENT CONCEPT COLLECTION

MANAGEMENT CONCEPT COLLECTION – S.E.P.P. COLLECTION

Collection of garments will protect you even in the most severe weather conditions. The fleeces, softshells and other linings in this collection are fully compatible with the S.E.P.P. jackets from the same collection, thanks to the I.L.S. concept. The main product of the S.E.P.P. collection is TORNHILL, CUMBRIA jacket, which can be combined with jackets DURANGO, PULCO, MERIDA, SHERWOOD, TORREON, GERMO and CARDI. Jackets can be worn separately or in combination with the TORNHILL, CUMBRIA jacket.

I.L.S. - (Interchangeable Lining System) provides wide choice of adapting garments outfit by simply adding or removing lining. To this purpose, the outer jacket with I.L.S. functionality has a corresponding, extra zipper inside

HIGH VISIBILITY GARMENTS

EN ISO 20471 high-visibility warning clothing for professional use

RIS 3279 TOM high-visibility clothing for the Railway Group

INFORMATION FOR PROPER USE OF HIGH-VISIBILITY WARNING GARMENTS ACCORDING TO VALID STANDARDS

The Labour Code obliges the employer to provide workers personal protective equipment when using collective protection when not possible to eliminate risk or minimize it to an acceptable level. To reduce the risk of potential injuries due to poor visibility, the worker is obliged ti use adequate high visibility warning clothes.

The requirements for the high visibility warning garments are defined by EN ISO 20471, published in 2013 or EN 471 + A1: 2007 (or earlier EN 471: 2003), which shall remain applicable for garments made when the old standards were valid.

Standard divides garments into classes graded by the size of high visibility area:

GARMENTS CLASSES

Material	Class 1	Class 2	Class 3
Background material	0,14 m^2	0,50 m^2	0,80 m^2
Reflective material	0,10 m^2	0,13 m^2	0,20 m^2
Combined material	0,20 m^2	–	–

MINIMAL REQUIREMENTS

The standard defines the minimum requirements for the design of clothing with regard to the placement and the number of high visibility elements

To ensure the highest possible level of protection (even when bending) should be warning garments with high visibility should be also equipped with vertical retroreflective stripes.

For work on roads and railway tracks with no ongoing traffic (new roads, repair of existing roads with the complete elimination of traffic) and their surroundings the minimum class of garment is n.2 – Intermediate level of protection.

For work on roads and railway tracks, where traffic is not completely halted, and their surroundings the minimum class of garment set is n.3 – Highest level of protection.

Warning garments with high visibility should be used in minimal combination: overalls, bib PANTS or PANTS with belt or braces complemented with coat or vest, which meets the requirements of the appropriate class according to EN ISO 20471: 2013.
(overall Class 2 or Class 3 if required, trousers Class 1, vest or jacket Class 2 or Class 3 per requirement).

IMPORTANT

To comply the requirements for providing of PPE personal protective equipment – High-visibility warning garments – is required to meet the Government Regulation 21/2003 Coll., Laying down technical requirements for personal protective equipment. Meeting the requirements of Government Regulation 21/2003 Coll. We can prove certification according to EN ISO 20471: 2013. If the employer provides their employees garments based on individual clothing patterns and design, that comply with some or all of the above requirements for the material and reflective elements, but are not actually certified, they the risk of responsibility for the providing of inappropriate PPE personal protective equipment to their employees.

I.L.S. (Interchangeable Lining System)

Our Interchangeable Lining System or I.L.S. allows you to quickly adapt your outfit, by simply adding or removing the lining. To this purpose, the outer jacket with I.L.S. functionality has a corresponding extra zipper inside. In this way, the wearer is protected against the harsh cold of the winter. Then later, when temperatures rise again, the extra zipped in garment can be removed very easily, thus making the jacket usable for the summer.

CHEMSAFE

CHEMSAFE coveralls protect against a wide range of hazardous substances, from chemicals to radioactive particles to infectious agents. Some of them are breathable, some of them have an impermeable layer and taped seams for even greater protection. Coveralls are comfortable and serve as an excellent barrier for all types of particles.

CHEMSAFE coveralls can also be ordered in packages for VAM (automatic vending machines).

MULTINORM GARMENTS

NEW

Flames, heat, metal splashes, chemicals, risks of explosions? Are you facing these hazards every day at work? In such conditions, you need multi-norm protective clothes. Our solutions offer the best possible protection against multiple threats and significantly reduce the chances of serious injuries.

Our multi-norm products meet the latest and most stringent norms concerning flame retardant and antistatic properties, welding, protection against electric arc flashovers and chemicals: EN 11612, 11611, 1149-5, and 61482. Many of our multi-norm products also comply with EN 20471 to offer good visibility, day and night. We recently added multi-norm workwear to our product range. This allows us to become a "one-stop-shop" in the domain of multi-norm garments.

RESULTS OF THE VISIBILITY CLASSES ACCORDING TO EN ISO 20471

The total area of reflective and high-visibility materials on the combination of trousers and upper part of the garment meets the requirements for the area size of these materials according to EN ISO 20471 and the class indicated at the relevant products.

CUT-RESISTANT GARMENTS

EN ISO 11393: Protection against hand-held chainsaws

The European standard EN ISO 11393 (supersedes EN 381) complies with protective clothing for chainsaw users. This norm is divided into different parts (or designs).

Each part treats a specific part of the body.

» EN ISO 11393-2 Leg protection
» EN ISO 11393-6 Upper body protection
» EN ISO 11393-4 Protective gloves
» EN ISO 11393-5 Protective gaiters

Both garments standards EN ISO 11393-2 Leg protectors and EN ISO 11393-6 Upper body protection prescribes 4 classes that correspond to the chain speed with which the tests have been done:

» Class 0 : 16 m/s
» Class 1 : 20 m/s
» Class 2 : 24 m/s
» Class 3 : 28 m/s

EN ISO 11393-2: Leg protectors

EN ISO 11393-2

This part of European standard EN ISO 11393 specifies the demands for leg protection wear and defines following types (or designs) of leg protection wear, according to the kind of protection:

The chainsaw protective clothing of type A and type B are mainly intended to be used for forestry work by professional lumber jacks who have been trained and informed.

Type A

Type A (or front protection) covers each leg partly (180°) and 5 cm to the interior part of the right leg and 5 cm to the exterior part of the left leg. Protection starts at max. 5 cm from the bottom of the leg and ends at min. 20 cm above the crotch.

Type B

Type B is the description of an entirely new style: the Chainsaw Protective Chaps.

EN ISO 11393-6: Upper body protectors

EN ISO 11393-6

The type A images show the design of a chainsaw protective jacket according to standard EN ISO 11393-6:2019.

On both the front and back side of the jacket, the standard defines a minimum surface of protective inlay on the shoulders, arms and chest. On the front side of the sleeves, the protective inlay must cover a minimum of 80% of the total surface and the non-protected surface from the end of the sleeves must not exceed 70 mm.

The two B images above show the design of a chainsaw protective jacket according to standard EN ISO 11393-6:2019 with additional full front protection.

Chainsaw jackets are more and more used for working on servicing platforms, for occasional use of the chainsaw or in exceptional and dangerous working circumstances. As a consequence, 2 jackets (1SIA and 1SIS) of our product range have additional belly protection on top of the standard in order to provide even more safety.

Basically, conception is the same as a normal standard jacket but protection of the abdomen (see picture) was added.

CUT AND PUNCTURE RESISTANT – GLOVES

Over recent years, changes in the manufacturing process of protective gloves has meant that the well established method of hand protection testing (EN388:2003), and in particular the test to assess protection against cuts has now been deemed no longer fit for purpose. Whilst the old system in EN388:2003 and its 1-5 numbering system was easy to understand, the development of newer cut resistant materials combined with a drive from industry to provide the highest level of cut protection possible meant that the method for testing hand protection needed to be revised.

EN388:2016 seeks to update the standard and by doing this, 2 tests have been revised (abrasion and cut) and 2 new tests have been included (straight blade cut resistance and impact resistance).

EN388:2003 Standards specifies physical and mechanical aggression caused by abrasion, blade cut, tearing and puncture. EN388:2016 updates the existing standard with this new test method for abrasion, blade cut & impact resistance. EN ISO 13997:1999 (TDM test) records cut results as a Newton value - the force of the blade on the glove material needed to cut through the material 20mm. The results are represented on a scale A-F.

PERFORMANCE LEVEL P - IMPACT RESISTANCE
Impact-resistant properties to 5J

PERFORMANCE LEVELS A – F - STRAIGHT BLADE CUT RESISTANCE
(TDM cut test) Measures the average load to achieve the moment of cut-though

PERFORMANCE LEVELS 1-4 - PUNCTURE RESISTANCE
Force required to pierce the sample with a standardised punch.

PERFORMANCE LEVELS 1-4 - TEAR RESISTANCE
Maximum force required to tear the sample.

PERFORMANCE LEVELS 1-5 - BLADE CUT RESISTANCE (Coup cut test)
Number of cycles required to cut the sample at constant speed.

PERFORMANCE LEVELS 1-4 - ABRASION RESISTANCE
Number of cycles required to damage the sample at constant speed.

EN 388:2016	Level 1	Level 2	Level 3	Level 4	Level 5
Abrasion resistance (number of cycles)	100	500	2,000	8,000	–
Blade cut resistance (index) Coup test method	1.2	2.5	5	10	20
Tear resistance (N)	10	25	50	75	–

PACKAGING FOR AUTOMATIC VENDING MACHINES (VAM)

SAY STOP TO THE RE-PACKAGING OF GLOVES

» compact packaging is compatible with most types of vending machines - helix, carousel
» continuous glove dispensing is ensured by packing in shrink wrap
» easier vending machine re-filling, without time-consuming repackaging or sorting

If you didn't find the type you're looking for, please contact us through our sales team.

SB	basic requirements
S1 = SB +	closed seat region, antistatic, energy absorption in heel area
S1P = S1+P	antipuncture midsole
S2 = S1 +	conjuction and absorbancy of water
S3 = S2 +	penetration resistance, cleated outsole
S4 = SB +	antistatic, energy absorption in heel area
S5 = S4 +	penetration resistance, cleated outsole

EN ISO 20347:2012 – OCCUPATIONAL SHOES (without toe cap)

OB	basic requirements
O1 = OB +	closed seat region, antistatic, energy absorption in heel area
O2 = O1 +	conjuction and absorbancy of water
O3 = O2 +	penetration resistance, cleated outsole
O4 = OB +	closed seat region, antistatic, energy absorption in heel area
O5 = O4 +	penetration resistance, cleated outsole

EN ISO 17249 safety footwear with resistance to chainsaw cutting

SHOES – EXPLANATIONS

- energy absorption in heel area
- antislip outsole
- water resistant upper
- safety toe cap
- metatarsal protection
- ESD – electrostatic discharge (EN 61340)
- antiperforation steel midsole
- breathable upper
- protection against cold
- fuel and oil resistant outsole
- antistatic shoes
- heat resistant outsole
- non-metallic toe cap
- antiperforation non-metallic midsole
- available in large sizes up to 50
- available in small sizes from 35

PUTEK® PUTEK fabric is a very important technological innovation in the field of safety footwear because it transforms the upper into a real barrier of protection. It combines the best function of breathability and waterproofing and thanks to RIPSTOP technology, a reinforcement technique that makes the fabric resistant to tearing, provides resistance to wear and traction while remaining extremely light and flexible. It is crease-resistant and non-deformable, elastic and easy to maintain.

BARTON® LEATHER Genuine leather characterized by the flawless thick weft finish (Dollar print) that results particularly flexible and elastic thanks to the different processing stages.

JACQUARD® FABRIC Fabric made from high tenacity polyamide yarns that gives the upper exceptional resistance to tearing and abrasion, thus ensuring greater durability to the entire footwear; the Jacquard fabric is also particularly light and breathable.

PLR® Polyurethane leather reinforcement placed in the most exposed areas of the footwear in order to prevent its physiological deterioration. The polymer applied on the surface of the highly stressed areas is hypoallergenic and, besides resisting to the action of time, guarantees the absence of cracks and deformations and very high resistance to both low and high temperatures.

SILON® Highly breathable and abrasion-resistant microfiber lining with anti-microbial and antibacterial treatment.

SANITIZED® INSOLE Removable insole, antistatic and anti-odour, which guarantees exceptional performance in terms of water vapour absorption and release capacity. Moreover, thanks to SANITIZED® technology, the surface in contact with the sole of the user's foot benefits from the integrated hygienic function that prevents the proliferation of any potentially harmful microorganism.

AIRNET® MESH Lining in 3-layer fabric characterized by a network of micro-channels that, in addition to perfectly enveloping the foot, ensures exceptional breathability and therefore the total release of water vapour outside the shoe. The material also stands out for its abrasion-resistant functionality and antimicrobial and antibacterial treatment.

ULTRALIGHT FOOTWEAR Footwear whose manufacturing process, from the choice of raw materials to the production method, is completely aimed at keeping the weight low while maintaining the highest standards of protection performance.

SHOES

SAFETY PANDA®
Italian Style at Work

All PANDA SAFETY models
are designed and manufactured
in Company's factories
placed in ITALY.

100% MADE IN ITALY
WITH CARE AND PASSION

OUR STRENGTHS

The excellence of **PANDA SAFETY** footwear comes from the values that underlie the production process:
QUALITY, EXPERIENCE and **SPECIALIZED MANPOWER.**

SAFETY

PANDA SAFETY's **forty years of experience** results in an in-depth knowledge of the working environments in which the footwear will be used and therefore in the development of products that can best meet **the real needs for the protection of workers**.

COMFORT

The internal profile of all PANDA SAFETY sole models follows and adapts to the **natural morphology of the sole of the human foot**, thus guaranteeing the **highest level of comfort**; even in case of prolonged use, in fact, the user does not feel the slightest sense of heaviness or fatigue thanks to the function of help and support of the walk, both in the pushing and in the strike phase, together with the action of maintaining a correct posture.

All PANDA SAFETY products are certified according to the European standards **EN ISO 20345:2011** or **EN ISO 20347:2012** and the Company got the **ISO 9001, ISO 14001** and **ISO 45001** certifications.

WHAT NEW BRINGS THE STANDARD EN ISO 20345:2022?

THE CURRENT STANDARD FOR SAFETY SHOES EN ISO 20345: 2012 WILL BE UPDATED TO EN ISO 20345: 2022. SO, WHAT IS NEW AND WHAT CHANGES WILL WE SEE? HERE IS A REVIEW OF THE MOST SIGNIFICANT CHANGES POINT BY POINT.

1. REQUIREMENTS FOR NON-SLIP SAFETY (SR)

Old markings SRA, SRB and SRC will no longer exist. Slip testing similar to SRA will become mandatory for all safety footwear and therefore will have no special marking. In addition to the basic certification, manufacturers can perform an additional slip-resistance test, which if passed, the footwear will come with the marking SR (Slip Resistance). Shoes with studs, which in practice can be difficult or even impossible to test according to the standard, can be marked with the following symbol: Ø. The test methods are slightly adjusted to mimic reality more closely. For example, all slip-resistance tests are conducted on a ceramic tile surface.

2. REQUIREMENTS FOR PUNCTURE RESISTANCE (P or PL, PS)

A shoe fitted with protection against nail perforation has previously had the marking P.
However, that marking does not say what material is used for the protection. The new standard clarifies better what material the protection consists of and what nail size was used in the tests. The smaller the diameter of the tip, the higher the pressure and consequently also higher requirements for protection.
P: Steel protective insoles, diameter of test nail 4.5 mm.
PL: Non-metallic protective insoles, diameter of test nail 4.5 mm.
PS: Non-metallic protective insoles, diameter of test nail 3 mm.
Protection level S1 will still be available with the added P, i.e., S1P. However, since the tests for puncture protection have been extended to P, PL, and PS; the protection level S1 can be therefore specified with following additions; S1P, S1PL and S1PS.

3. LEVELS OF PROTECTION (SB – S7)

The number of protection levels has increased from SB - S5 to SB - S7 with associated sublevels.
The previous protection levels were divided as follows:
SB, S1, S2, S3, S4 and S5 where SB is the only protection level that allows open heel. S1 was sometimes additionally fitted with puncture protection, then marked as S1P. S4 and S5 are so-called class II products (rubber boots).
The new main division is:
SB, S1, S2, S3, S4, S5, S6 and S7.
Protection level S1 will still be available with the added P, i.e., S1P. However, since the tests for puncture protection have been extended to P, PL, and PS; the protection level S1 can be therefore specified with following additions; S1P, S1PL and S1PS.
Other protection levels that already include requirements for puncture protection are not stated unlike before, as the protection level itself already means that the product meets these requirements. However, it is interesting to know what type of puncture protection the product includes. For example, protection category S3 (the requirement for puncture protection is part of the protection category) is therefore divided into the following three levels - S3, S3L and S3S.
S3 features a steel anti-perforation insole and is tested with a steel nail, S3L features non-metallic anti-perforation insole and is tested with a large nail of 4,5 mm diameter (L = Large), while S3S is equipped with non-metallic anti-perforation insole and is tested with a small nail of 3 mm diameter (S = Small). In the same way, the protection levels S5 and S7 are marked, as these protection levels also have requirements for perforation protection.

4. WATER RESISTANCE (WR)

Two new categories of protection have been added: S6 and S7. Both S6 and S7 are required to be water-resistant (WR). Otherwise, S6 have the same protection features as S2 but with additional requirements for water tightness (WR), while S7 corresponds with S3 with additional requirements for water tightness (WR).
S2 and S3 certified footwear has, according to the "old" standard, a water repellent upper (WRU - Water Repellent Upper). However, only the material itself is tested to obtain WRU. When the material is included in a shoe, the shoe as a whole can lose its water-repellent ability if water penetrates the seams.
In the new standard, the marking WRU no longer exists as it has been replaced by the marking WPA (Water penetration and absorption), and the marking as already mentioned; WR.

5. LADDER GRIP (LG)

Previously, "heel grip for ladder" was part of the standard of shoes intended for firefighters. That part has been copied for a stand-alone additional test for all safety footwear. Due to that, all safety shoes can now be tested with regard to step grip in the new standard. Please note that this is one of several additional tests that are not mandatory. Footwear in our portfolio mostly comply with these requirements.

6. FO IS NO LONGER MANDATORY (FO)

The marking FO refers to the shoe sole's resistance to hydrocarbons (oils, petrol, etc.). This was previously a mandatory part for protection categories S1-S5, except for shoes with an open heel. FO will henceforth be an additional test that can be conducted for shoes intended for environments with hydrocarbons.

EXPLANATORY NOTES – SAFETY SHOES (WITH SAFETY TOE CAP) EN ISO 20345: 2022

- S–toe cap protection
- S–non-metallic toe cap protection
- P–puncture resistance (metallic insole)
- PL, PS–puncture resistance (non-metallic insole)
- E–energy absorption in the heel area
- SR–Slip resistance (ceramic tile floor with glycerine)
- A–antistatic footwear
- M–metatarsal protection
- WPA–upper resistant to water penetration and absorption
- WR–upper resistant to water
- CI–cold resistance of the sole
- FO–fuel and oil resistant outsole
- HRO–heat resistant outsole
- available in big size till 50
- available in small size from 35
- ESD–electrostatic discharge (EN 61340)

HOW TO CHOOSE THE RIGHT SHOES

Do you need to protect your toes?
Choose **safety** shoes with a toe cap.
It is marked with the letter **S**.

If your profession does not require toes protection, choose from **occupational** shoes marked with the letter **O**.

	CATEGORY	safety toe cap	oil and fuel resistant sole	antislip sole	absorption of energy in heel	antistatic shoes	antiperforation midsole	water resistant upper

EXPLANATORY NOTES

ADDITIONAL REQUIREMENTS	
HRO	Heat resistant outsole
WR	Water resistant
FO	Fuel and oil resistant outsole
M	Metatarsal protection (only safety shoes)
HI	Heat insulation
CI	Cold insulation

ANTISLIP REQUIREMENTS	
SRA	Slip resistant outsoles are tested on a ceramic tile wetted with dilute soap solution.
SRB	Slip resistant outsoles are tested on smooth steel with glycerol.
SRC	Slip resistant outsoles pass both SRA and SRB slip resistance tests.

BENEFITS	
MF	METAL FREE
ESD	Electrostatic discharge (EN 61340)

EYE PROTECTION – STANDARDS

EN 166 guaranteed minimum resistance of the protective eyewear against everyday risks including dropping the protective eyewear onto the ground, ageing by light exposure, exposure to heat or corrosion etc.

EN 169 personal eye-protection - filters for welding and related techniques - transmittance requirements and recommended use

EN 170 transmittance requirements

EN 172 personal eye protection - sunglare filters for industrial use

EN 175 equipment for eye and face protection during welding and allied processes

EN 1731 mesh eye and face protectors

EN 379 automatic welding filters

EYE PROTECTION – EXPLANATIONS

CODE	FILTER TYPE	SHADE OF LENS		MECHANICAL STRENGTH				ADDITIONAL REQUIREMENTS	
2	UV filter	1.2	clear or yellow	impact level		maximum speed	lens material	3	splashing liquids
2C or 3	UV filter with good color recognition	1.7	orange or I/O indoor outdoor	A(T)	impact with high energy	190 m/s	polycarbonate	8	short circuit electric arc
4	infrared filter	2.5	brown or grey	B(T)	impact with medium energy	120 m/s	polycarbonate, acetate	9	molten metal and hot particles
5	sun filter	3.1	dark brown, dark grey, blue or mirror	F(T)	impact with low energy	45 m/s	polycarbonate, acetate	K	surface damage fine particles
6	sun filter			S	increased strength	12 m/s	CR39, hardened glass	N	anti-fog
				T	protects against impacts in extreme temperatures (-5 °C, +55 °C)			R	reinforced reflection in IR (>60%)
								H	frame suitable for smaller head circumference (head circumference = 54 cm)

SHADE OF LENS

CLEAR LENSES

Clear visors are mostly suitable for workplaces where there is a need for perfect color recognition.

Examples of use: quality control, assembly, mechanical work.

SMOKE LENSES

Smoke visors are suitable for outdoor work because they reduce sun glare.

Examples of use: building construction, road construction, for driving.

YELLOW LENSES

Yellow visors are suitable for use in workplaces featuring low light conditions. They are also suitable for use when driving in foggy weather as well as in workplaces featuring solely artificial lightning, 24/7.

Examples of use: surface control, quality control after grinding, final control in paint shops, work in warehouses.

MIRROR LENSES

Mirror visors are suitable for improving the adaptation of the eyes to changes in light and they look awesome.

Examples of use: construction, outdoor sports (riding a bike or a horse, etc.), for driving.

BROWN LENSES

Brown visors are suitable for working outside during cloudy weather.

POLARIZED LENS

Polarised visors are suitable for drivers, fishermen and workers who need to minimise any irritating reflections from shiny surfaces.

(I/O) INDOOR/OUTDOOR LENSES

I/O lenses allow more visible light transmission than Smoke lenses and are the best solution for users who move frequently between indoors and outdoors. The lightly tinted lenses allow enough light transmission to see in indoor lighting, but are still able to reduce intense direct sunlight and glare, when the user is outside.

IR LENSES

IR lenses are suitable for protection against visible UV light and IR radiation according to the standard EN 169.

BLUE LIGHT BLOCKER FILTER

Absorbs blue light, preventing it from passing through the lens to your eyes. Use when working with digital screens, smartphones, tablets and in areas with LED lighting

Evolution® OPTICAL RANGE

SWISS ONE

SIMPLEST PROCESS ON THE MARKET!

Because at Swiss One we know that safety is your priority, and adapted and quality equipment is essential to protect your employees, we created the Swiss One Evolution® Optical range. A 100% integrated service that combines safety eyewear and your optical requirements.

EFFORTLESS

A single contact and supplier account for all your Swiss One and JSP requests. Training and demo suitcases with the entire range of EVO® Optical products provided to support sales team.

QUALITY

Made in France, where the EVO® Optical range laboratory handles cutting, assembly, packaging and after sales service. This ensures simple and efficient communication and logistics.

TECHNICAL

A Swiss One optician, an expert in safety glasses and the EVO® Optical range will be at your disposal as sole technical contact.

bollé SAFETY

PRESCRIPTION SAFETY EYEWEAR

In our wide Eyewear portfolio there is also prescription safety eyewear. We offer to our customers a complete service starting with a professional consultation and ending with the rapid delivery of specific prescription safety eyewear that meets the European EN 166: 2001 standard.

HEARING PROTECTION – STANDARDS

EN 352:2002 European standard for protectors against noise is made in several parts for the safety and testings on the different types of individual noise protectors

EN 458:2004 hearing protectors – recommendations for selection, use, care and maintenance

SNR: xx dB SRN (single number rating) is only a general means of comparing different ear protectors. Generally the higher the SNR number the better the performance of the ear defender across a range of noise frequencies. For example a SNR of 27 decibel may not give a 27 decibel attenuation at all High, Medium or Low frequencies.

HEARING PROTECTION – EXPLANATIONS

What could be dangerous?

Frequency (Hz) Intensity (dB) Exposure time (min.)

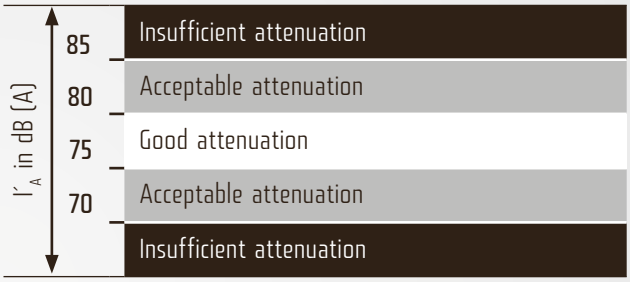
How many dB are dangerous?

After long exposion a significant hearing damage may occur.

Explosions may cause an eardrum rupture.

How many dB must be blocked?

Noise in the workplace minus attenuation of earplugs.



85 dB	91 dB	97 dB	103 dB	115 dB	124 dB	140 dB	160 dB
a lawn mower	a moving train	a drill	a pneumatic jackhammer	a chainsaw	a pneumatic riveter	a start of a jet	an explosion, a shotgun blast

HARD HAT – STANDARDS

Is a type of helmet predominantly used in workplace environments such as industrial or construction sites to protect the head from injury due to falling objects, impact with other objects, debris, rain, and electric shock. Hard hats can be combined with face protection and hearing protection.

EN 397 the standard industrial safety helmet standard
EN 14052 the standard for high performance industrial safety helmets
EN 12492 the standard for mountaineers
EN 50365 the standard for electrical insulation

BUMP CAP – STANDARDS

Is a lightweight hard hat using a simplified suspension or padding and a chin strap. Bump caps are used where there is a possibility of scraping or bumping one's head on equipment or structure projections, but are not sufficient to absorb large impacts, such as that from a tool dropped from several floors.

EN 812 the standard for industrial bump caps

REFIL

ERGO LINE

10XX – REFIL prepared a new series of Ergo-line shaped respirators for its 25th anniversary. The main goal in the development of this series was maximum user comfort. The new ergonomic shape and sealing hem significantly improve the sealing of the respirator on the face. The exhaust valve was designed for optimal air flow with minimal resistance, greatly facilitating exhalation and heat and moisture removal. Emphasis was put on the use of the respirator in combination with glasses, which do not become foggy during an activity. The filter materials of REFIL respirators generally have very low respiratory resistances and high filtration efficiency and measured values confirm that this applies to the new **Ergo-line** respirators as well.

ECONOMY LINE

5XX – folding form are intended for lighter physical activities. Only package of 100–200 pcs available.

TOP LINE

6XX – folding form respirators with the highest comfort, suitable for very hard works. Modern design make possible to be easily worn and offer good seal for various shapes of faces and to speak when the respirator is worn without loose face seal.

STANDARD LINE

7XX – comfortable particulate respirators are suitable for intermittent use with frequent mounting and de-mounting of the mask and breaks at work.

EXAMPLES OF ACTIVITIES AND RECOMMENDED FILTER CLASSES

WORK ACTIVITY	TYPE OF PARTICLES	RECOMMENDED PROTECTION
sorting and disposal of waste, clearing out attic spaces	- bacteria, mold, fungi, odours - soil dust, mites	FFP2 + active carbon FFP2
grinding, cutting, drilling, milling	- concrete, stone - metal, rust - softwood - hardwood - glass, resin, fiberglass - old coatings - gypsum	FFP2 FFP2 FFP2 FFP3** FFP2 FFP2 FFP1*
welding	- steel, zinc, welding fumes - stainless steel, aluminium	FFP2 + active carbon FFP3
handling with	- asbestos, lead - soot - cement	FFP3 FFP2 FFP1*
installation of insulation	- mineral and glass wool insulation	FFP3**
mining	- coal, stone	FFP2
crop production	- grain dust, flour - soil dust - dust of dried plants (tea, herbs, coffee)	FFP1 FFP2 FFP1
contact with allergens	- pollen, animal fur, mold, mites	FFP2
contact with viruses and bacteria	- viruses - bacteria	FFP3 FFP3
environment	- smog	FFP2
textile industry	- natural and synthetic textile fibres	FFP1

WARNING: The table contains only general guidelines. To be sure about the right protection users need to know the exact concentrations of relevant pollutants in the air and exceeded permitted limits. Always read the instructions on the package.

* At higher concentrations FFP2 ** At low concentrations FFP2

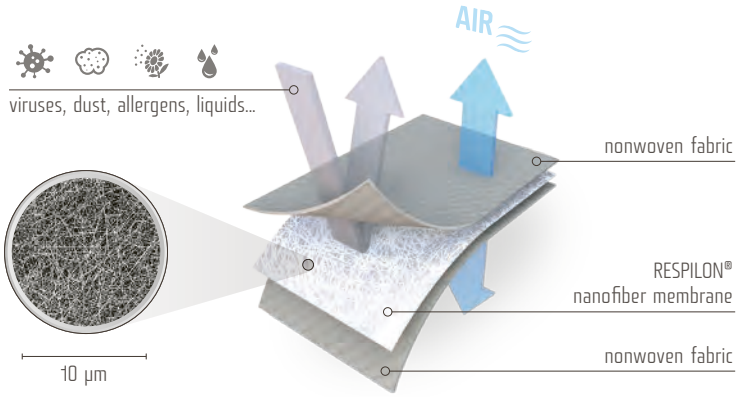
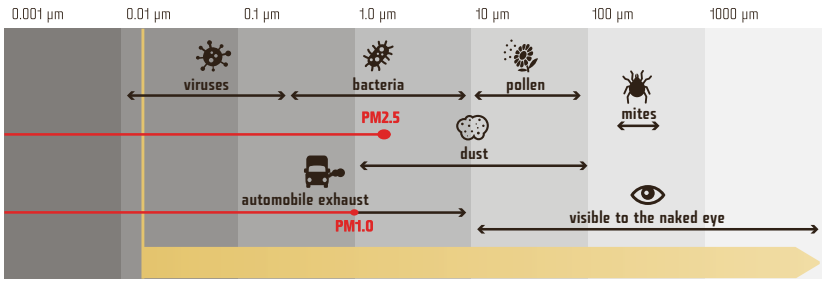
FILTER CLASS FFP2

HI-TECH **NANO** FIBER

- MECHANICAL FILTRATION
- SUPER LIGHT
- POSSIBLE STERILIZATION BY 65% ALCOHOL UP TO 3 TIMES

FULL FFP2 RESPIRATORS ACCORDING TO EN 149





With RespiRaptor® and RespiPro® respirators you are protected from:

viruses · bacteria · dust · mold · smog · emissions · pollen · mites

CUSTOMERS AND SUITABLE USE

- ✔ agriculture
- ✔ metal working
- ✔ construction sites
- ✔ frontline workers
- ✔ medical workers and teachers
- ✔ public transport drivers
- ✔ police and firefighters
- ✔ general public

BENEFITS

- ✔ Virus filtration
- ✔ 2-Way-Protection
- ✔ Easy to talk through
- ✔ Long-Lasting Filtration Efficiency
- ✔ Breathability
- ✔ Perfect facefit
- ✔ Fulfils EU standards

Sundström®

WELDING SHIELD SR 574

The SR 574 welding shield attachment is a modern, innovative product for our appreciated SR 570, designed and developed based on the needs and requirements from the market.

Welding present numerous health and safety hazards, both for welders and for people in the vicinity.

As a welder, it is very important to protect your respiratory system and eyes against metal dust and fumes as well as sparks and spatter during welding and grinding operations.

The SR 574 welding shield is an attachment for the SR 570 face shield and is a part of Sundström respiratory protective system. The solution SR 574 with SR 570 is a robust face shield with a flip-up visor, that gives the user comfortable and safe respiratory and eye protection. The shield is manufactured in a material that permits use in tough environments.

The welding shield can be used with either our SR 500 or SR 700 fan units, equipped with our extensive range of filters that offer our users the highest protection level, TH3. If the work environment requires it can also be used with the compressed air attachment SR 507.

The shield is fitted with an attachment for hearing protectors. A wide range of accessories enable the user to customize the shield for their work situation.

- easily operated battery powered fan with particle- or combination filters
- the SR 500 is a battery-powered fan that, together with a filter and an approved head top, is included in the Sundström fan-assisted respiratory protective device systems
- the SR 500 can be used as an alternative to filter respirators in all situations in which these are recommended
- this applies particularly to work that is hard, warm or of long duration
- the human interface may consist of a hood, face shield, half mask or full face mask
- the fan is equipped with a filter, and the filtered air is fed through a hose to the human interface

- easily operated battery powered fan with particle filters
- the SR 700 is a battery-powered fan that, together with particle filter SR 510 P3 R or SR 710 P3 R and an approved head top, is included in the Sundström fan-assisted respiratory protective device systems
- the SR 700 can be used as an alternative to filter respirators in all situations in which these are recommended
- this applies particularly to work that is hard, warm or of long duration
- the fan is equipped with filter, and the filtered air is fed through a hose to the human interface
- the pressure then generated prevents surrounding pollutants from penetrating into the mask

ESCAPE HOOD WITH FILTER FOR EVACUATION IN CASE OF FIRE OR/AND CHEMICAL EMISSION ACCIDENT.
The SR 77-3 Escape Hood is a filtering respiratory protective device combined with a hood for self rescue in the event of a fire or a chemical emission accident. The hood is based on a Sundström silicone half mask, which is mounted in a hood made of flame-resistant material. The hoods are vacuum-packed in aluminum bags. The hood can be put on quickly and simply without prior adjustment. The hood is available in two sizes and fits most adults and teenagers. The hood is equipped with gas filter SR 331-2, ABEK1-CO and particle filter SR 510, P3 , and provides shorttime protection against carbon monoxide and other toxic gases and particles that may be emitted in a fire or in a chemical emission accident. A1, organic gases and vapours, such as solvents, with boiling points above 65 °C. B1, inorganic gases and vapours, such as chlorine, hydrogen sulphide and hydrogen cyanide. E1, acidic gases and vapours such as sulphur dioxide and hydrogen fluoride. K1, ammonia and certain amines, such as ethylene diamine.

FALL PROTECTION – STANDARDS

weight:	1.83 kg

Revolutionary, new, patented energy absorber with the large weight range from 50 - 140kg (110 - 310 lbs.) that always withstands a maximum impact of less than 6kN at a maximum absorber length of 1.75m (5.7 Feet). The final impact resistance of 22kN, also in the absorber, before AND after a fall is exceptional as well. SKYSAFE PRO furthermore meets the most relevant international standards in one SINGLE product. UNIQUE: The built-in, adjustable RESCUE LOOPS! As a result, rescuers need not set up a rescue system and hereby save precious time in a rescue! Available in four versions with different carabiner combinations: I-web, Y-web, I-web tie-back, Y-web tie-back.

standards:	EN 360:2002
length:	3 m, 6 m, 10 m, 15 m
load capacity:	140 kg
weight:	2.8-7.3 kg

HK PLUS fall-arrest blocks stand for a high degree of freedom of movement along with a short fall distance, which makes these reliable fall arresters the ideal companions for many jobs at height. The automatic rope retraction ensures that only the rope length actually required is extended. This means that the arrest distance is always as short as possible, whether the system is anchored overhead or applied horizontally.

Edge suitability: HK PLUS devices are suitable for edges without using additional energy absorbers, which makes them appropriate for horizontal use as well.

weigth:	80 g/m²
number of falls:	20
elongation:	50–150 kg: 3.3%

Especially for work at height and securing of persons above free space.

USE:

» work at height

HORIZONTAL WEBBING LIFELINE AE

08070018 99 110 10 m
MOQ 1/1

08070018 99 120 20 m
MOQ 1/1

standards:	EN 795B
length:	10 m (AE 310), 20 m (AE 320)

Temporary horizontal webbing lifeline AE320 – possibility of length and tension adjustment by a ratchet– for protection of up to 3 persons at the same time – 10 m, 20 m.

USE:

» for making lifeline for 3 person webbing is in bag

ACCESSORIES

UNIVERSAL BAG AX011

lanex

08100006 99 999
MOQ 1/1

dimensions: 300 × 300 × 300 mm

Universal bag AX011 for material transport; resistant and waterproof material. Two shoulder straps, 30 × 60 cm, 42 l.

DUFFLE L

SKYLOTEC

08090021 99 999
MOQ 1/1

volume: 90 l
weight: 1.4 kg

The Duffle bag, 90 litre, is a black hole when it comes to storage. For long trips or short trips, with your entire climbing rig or most of your wardrobe, this is the bag for you. It has a zipped outer pocket, zipped mesh pocket on the inside of the lid and is made of robust, water-resistant tarpaulin PVC and 1200 D Polyester. Wide shoulder straps, which double up as backpack straps, mean the Duffle bag is comfortable to carry even when fully loaded.

CARRYING BAG STANDARD

FALL SAFE

08100033 99 999
MOQ 1/1

MEET THE NEW
FACE OF PPE
ANTI-FATIGUE MATS PROTECT USERS FROM
HEADACHES by easing tension in your shoulders and neck.
STIFFNESS by encouraging regular muscle movement and posture changes.
LOWER BACK PAIN by reducing pressure on the spine, and strain on the back muscles.
POOR CIRCULATION by frequent lower muscle movement.
LOWERS THE CHANCE OF SLIPS when the mat has a slip resistant surface.
ARCH AND HEEL PAIN often caused by flattening of the feet.
COLD CONCRETE FLOORS which can give the sensation of being colder.
Speak to your CERVA representative about our anti-fatigue matting range.

PACKING 1

GEL KNEE PADS

99010005 99 999
MOQ 1/8

EN 14404 +A1:2010 Type 1, Class 1

material: foam rubber
size: UNI
colour: black

» gel knee pads for better working comfort
» neoprene straps for a secure and flexible fit

LAIDE

99010013 99 999
MOQ 1/50

EN 14404 +A1:2010 Type 2, Class 1

material: EVA (ethylene vinyl acetate)
size: UNI
colour: black

» knee pads are designed to provide knee protection during work in kneeling position

FENTO 200 PRO
KNEE PADS

99010025 99 999
MOQ 1/12

outer layer: wear-resistant EVA
inner layer: polyester upholstery
size: UNI
colour: black-orange

» ergonomic wedge for right pressure distribution
» exceptionally wear-resistant
» flat surface for extra stability
» weight just 250 grams
» wide elastic straps for comfort adjustment

FENTO 200/400 PRO
PROTECTION CAP

99010028 99 999
MOQ 1/1

material: polyester
size: UNI

PACKING

Hybrid CONCEPT

PACKING

Hybrid CONCEPT

ACTIK E099FA00
HEADLAMP

99060036 99 999
MOQ 1/1

- lightweight, compact and bright: 350 lumens at 86 g
- two beam patterns (flood or mixed) and several white brightness levels meet the need for high-performance lighting in dynamic outdoor activities:
  - proximity or distance vision and rapid movement
  - red lighting preserves night vision and prevents members of a group from blinding each other
- simple to use and practical:
  - single button for quick and easy selection of brightness or light colour
  - HYBRID CONCEPT design: ACTIK comes with three standard batterie and is also compatible with the CORE rechargeable battery
  - reflective headband for night visibility
  - detachable, washable headband
  - LOCK function to avoid accidentally turning it on during transit or storage
- compatible with mounting accessories that allow the lamp to be attached to any kind of helmet, or to a bicycle

E091DA00 TIKKINA
HEADLAMP

99060029 99 999
MOQ 1/1

- headlamp offers 150-lumen brightness and a wide beam for proximity lighting
- simple, compact and with a long burn time
- it is practical for outdoor activities like camping or trekking, or for traveling, and also for daily activities and projects around the house
- three lighting modes: proximity, movement and distance vision
- TIKKINA is a HYBRID headlamp: it comes with three standard batteries, and is also compatible with the CORE rechargeable battery
- water resistant IP X4

99110031 99 999
MOQ 1/10

Highly visible blue plasters with built-in metal surface that can be traced by a metal detector. The plasters are made of a PE material that allows the skin to breathe and is also waterproof and skinfriendly. The dispenser contains 90 plasters and can be installed where the need is greatest.
Dispenser: W: 23 cm. × H: 13.5 cm.

QUICKFIX DETECTABLE PLASTER 5513

plum

99110033 99 999
MOQ 1/45

Detectable plaster refill with 45 plasters. Packaging: 6 pcs.

QUICKFIX UNO 5533

plum

99110048 99 999
MOQ 1/10

Small and modern plaster dispenser in a unique design. Developed to combine workplace safety with a pure style. Perfect for offices, restaurants, educational institutions etc.
Dispenser: W: 130 mm × H: 87 mm × D: 38 mm. Packaging: 10 pcs.

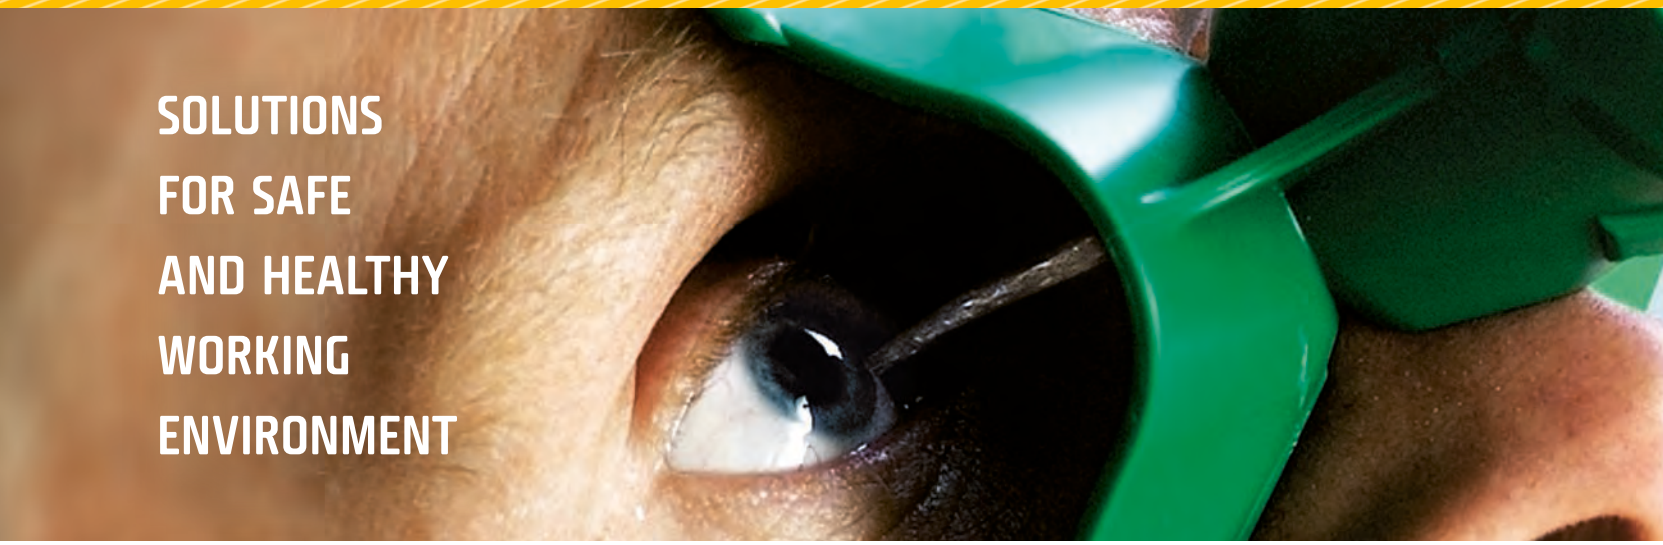
QUICKFIX MICRO 5518

plum

99110047 99 999
MOQ 1/200

Small and handy plaster sample containing 8 QuickFix Elastic plasters. Perfect for on the go and fits in any handbag, purse, pocket or office drawer. Or use them as samples and giveaways in direct mails, at fairs and exhibitions etc.
Packaging: 200 pcs.

EYEWASH



SOLUTIONS FOR SAFE AND HEALTHY WORKING ENVIRONMENT

WOUND AND EYEWASH SPRAY 4554

plum

99110052 99 999 250 ml
MOQ 1/12

With the new Plum Wound and Eyewash Spray, you get immediate and effective care for minor accidents such as cuts and scrapes on the skin or dust and dirt in the eyes. It helps minimize the risk of further infection or damage.

PRACTICAL SOLUTIONS FOR BUSY WORKING DAYS

Your hands, your eyes and your head are your most important working tools. Even a small incident can affect your work, and larger ones may cause an even greater impact if you are not prepared. By taking the correct precautions, you enable yourself to have the right first aid within reach, whereby many smaller everyday accidents can be minimized significantly.

Plum Eyewash is easy to use if an accident happens

Turn the eyecup in the direction of the arrow 360° until the seal breaks

Lean back, squeeze the bottle gently and rinse

Or lean forward and rinse by squeezing the bottle gently

PH NEUTRAL 4752

plum

99110027 99 999 200 ml
MOQ 1/10

» a small, handy bottle containing 4.9% sterile phosphate buffer solution that neutralises the eye´s fluid after accicdents involving acids or alkali
» the bottle is easy to take with you in the specially-designed belt bag, the first aid box, the tool-box etc.
» a wall mounting device is also available
» the bottle is provided with an ergonomic eye cup, a dust cap and clear instructions on the label
» durability 3 years

EYEWASH 4691, 4604

plum

99110026 99 999 200 ml
MOQ 1/10

99110028 99 999 500 ml
MOQ 1/12

» a small, handy bottle containing a 0.9% sterile sodium chloride solution
» the 200 ml bottle is easy to take with you in the specially-designed belt bag, the first aid box, the tool-box etc.
» complete with an ergonomic eye cup, a dust cap and clear instructions on the label
» durability 3 years

EYEWASH/PH NEUTRAL STATION 4770

plum

99110029 99 999 200 ml + 500 ml
MOQ 1/1

» wall station with
1 × 200 ml pH Neutral
1 × 500 ml Plum Eye Wash
integrated pictograms and mirror
» inclusive eye emergency plan
» suitable for use in workplaces where acids, alkali and foreign particles can penetrate the eye

BELT BAG 4692

plum

99300014 99 999 200 ml
MOQ 1/10

» a practical bag for attaching to a belt, overalls etc.
» easy to open if an accident occurs and provides safe, hygienic protection of the bottle
» must be filled with either Plum Eye Wash or pH Neutral 200 ml bottle

EXPLANATORY NOTES

NEW — New product / colour / size / lens

x in 1 — Possibility to use the product in different ways

XX XX — Extra large

WINTER — Suitable for winter

METAL FREE — Without metal components

-40° — Product is suitable for temperatures up to -40°C

UNISEX — Suitable for any gender

FOR KIDS — Children´s sizes

200 pcs per box — 200 pieces in the pack

3 PACK — 3 pieces in the pack

Vrifibetex — Unique blend of 3 kinds of fibre – cotton, polyester and elastic fibre spandex

VrifibetexPRO — Unique blend of 90% nylon and 10% spandex fiber

LUMICOTEX® — Lightweight blend of 50% polyester and 50% cotton

CORDURA Fabric — Technical fabric with extreme resistance against abrasion and tear

Global Recycled Standard — Main Material contains 100% GRS certified, recycled Polyester Certified by ECOCERT – license number 258751

Recycled Blended Claim Standard — Main Material contains 20% RCS certified, recycled Polyester Certified by ECOCERT – license number 258751

100% Organic Cotton — The Global Organic Textile Standard Certification (GOTS)

OEKO-TEX® Standard 100 — Tested for harmful substances

YKK — Ykk zip

MICRO FIBER — Made of microfiber

MERINO — Made of merino wool

SOY FIBRE — Made of soy fibres

BAMBOO — Made of bamboo fibres

Tencel — TENCEL™ cellulosic fibers of botanic origin define a new standard of sustainability and natural comfort

Guarantee Best Quality — Best quality of material

100% recyclable

°C — Climate temperature classes

VILOFT — Viscose fibre that wicks moisture away from the body and prevents the formation of bacteria

Protex — Modacrylic fibre with a self-extinguishing capability that prevents the spread of fire

PACKING — Available in 1 piece package with euro slot

PACKING — Available in 1 piece package with hanger

XX dB — Low level of noise attenuation 19–20 dB

XX dB — Medium level of noise attenuation 21–35 dB

XX dB — High level of noise attenuation 36–37 dB

AM/FM RADIO — Built-in FM stereo radio

BESTSELLER — The best selling product

YOUR LOGO HERE — Possibility of customer logo application

XX g — Lightest product in the category, weighing xx g

ERGO LINE — Range of pre-molded particulate respirators REFIL

ECONOMY LINE — The line of REFIL folding form respirators 5XX

STANDARD LINE — The line of REFIL folding and pre-molded form respirators 7XX

TOP LINE — The line of folding form respirators 6XX

Anti-Microbial — Odour elimination

Quick Absorption — Absorb sweat very quickly

Quick Dry — Quick drying

I.L.S. — Interchangeable Lining System - possibility to add or remove the lining

S.E.P.P. — S.E.P.P. - Sioen Extreme Protection Program for jackets offering protection even in the most severe weather conditions

Comfort Fit — Very comfortable to wear

Actives protect from the uncontrolled growth of microbes

FREEDOM 2 — Two way flexible outer shell

HydraTec — Special membrane which absorbs the water vapor and removes it through the lining to the outside

ANSELL GRIP — Coating treatment that minimizes the force required to grip dry, oily and wet tools or materials

INTERCEPT Cut Resistance Technology — Blends engineered, synthetic and natural fibers into high-performance yarns

S2 = S1 +	conjuction and absorption of water
S3 = S2 +	penetration resistance, cleated outsole
S4 = SB +	antistatic, energy absorption in heel area
S5 = S4 +	penetration resistance, cleated outsole

EN ISO 20347:2012 – OCCUPATIONAL SHOES (without toe cap)

OB	basic requirements
O1 = OB +	closed seat region, antistatic, energy absorption in heel area
O2 = O1 +	conjuction and absorption of water
O3 = O2 +	penetration resistance, cleated outsole
O4 = OB +	closed seat region, antistatic, energy absorption in heel area
O5 = O4 +	penetration resistance, cleated outsole

EN ISO 17249 safety footwear with resistance to chain saw cutting

EYE PROTECTION

EN 166	Guaranteed minimum resistance of the protective eyewear against everyday risks including dropping the protective eyewear onto the ground, ageing by light exposure, exposure to heat or corrosion etc.
EN 169	Personal eye-protection - filters for welding and related techniques - transmittance requirements and recommended use
EN 170	Transmittance requirements
EN 172	Personal eye protection - sunglare filters for industrial use
EN 175	Equipment for eye and face protection during welding and allied processes
EN 1731	Mesh eye and face protectors
EN 379	Automatic welding filters

HEARING PROTECTION

EN 352:2002	European standard for protectors against noise is made in several parts for the safety and testings on the different types of individual noise protectors
EN 458:2004	Hearing protectors – recommendations for selection, use, care and maintenance
SNR: xx dB	SNR (single number rating) is only a general means of comparing different ear protectors. Generally the higher the SNR number the better the performance of the ear defender across a range of noise frequencies. For example a SNR of 27 decibel may not give a 27 decibel attenuation at all High, Medium or Low frequencies

HARD HAT

Is a type of helmet predominantly used in workplace environments such as industrial or construction sites to protect the head from injury due to falling objects, impact with other objects, debris, rain, and electric shock. Hard hats could be combinated with face protection and hearing protection.

EN 397	The standard industrial safety helmets
EN 14052	The standard for high performance industrial safety helmets
EN 12492	The standard for mountaineers
EN 50365	The standard for electrical insulation

BUMP CAP

Is a lightweight hard hat using a simplified suspension or padding and a chin strap. Bump caps are used where there is a possibility of scraping or bumping one's head on equipment or structure projections, but are not sufficient to absorb large impacts, such as that from a tool dropped from several stories.

EN 812	The standard for industrial bump caps

PASSIVE RESPIRATORY PROTECTION

Respirators – disposable, reusable / Half-Facepiece masks / Full-Facepiece masks

EN 136	Full face masks
EN 143	Particle filters
EN 140	Half masks and quarter masks
EN 148-1	Respiratory protective devices - Threads for facepieces - Part 1: Standard thread connection
EN 149	Respiratory protective devices - filtering half masks to protect against particles - requirements, testing, marking
EN 14387	Gas filter(s) and combined filter(s)
EN 405	Respiratory protective devices - valved filtering half masks to protect against gases or gases and particles - requirements, testing, marking
EN 1827	Respiratory protective devices - half masks without inhalation valves and with separable filters to protect against gases or gases and particles or particles only - requirements, testing, marking

ACTIVE RESPIRATORY PROTECTION

Powered Air Systems

EN 12021	Respiratory equipment - compressed gases for breathing apparatus
EN 12941	Respiratory protective devices - powered filtering devices incorporating a helmet or a hood - requirements, testing, marking
EN 12942	Respiratory protective devices - power assisted filtering devices incorporating full face masks, half masks or quarter masks - Requirements, testing, marking
EN 14594	Respiratory protective devices - continuous flow compressed air line breathing apparatus - requirements, testing, marking
EN 60079-11	Equipment protection by intrinsic safety "i"
EN 60079-31	Equipment dust ignition protection by enclosure "t"
EN 60529	Degrees of protection provided by enclosures (IP Code)

SAFETY HARNESSES

EN 341	Personal fall protection equipment - descender devices for rescue
EN 353-1,2	PPE against falls from a height - guided type fall arresters
EN 354	Personal fall protection equipment. Lanyards.
EN 355	PPE against falls from a height - energy absorbers
EN 358	PPE for work positioning and prevention of falls from a height - belts for work positioning and restraint and work positioning lanyards
EN 360	PPE against falls from a height - retractable type fall arresters
EN 361	PPE against falls from a height - full body harnesses
EN 362	PPE against falls from a height - connectors
EN 363	Personal fall protection equipment - personal fall protection systems
EN 397	Industrial safety helmets
EN 795	Personal fall protection equipment - anchor devices
EN 813	Personal fall protection equipment - sit harnesses
EN 892	Mountaineering equipment - dynamic mountaineering ropes
EN 1496	Personal fall protection equipment - rescue lifting devices
EN 1497	Personal fall protection equipment - rescue harnesses
EN 1498	Personal fall protection equipment - rescue loops
EN 1868	PPE against falls from a height - list of equivalent terms
EN 1891	PPE for the prevention of falls from a height - low stretch kernmantel ropes
EN 12841	Personal fall protection equipment - rope adjustment devices
