the most modern showground in Slovenia at the crossroads between east and west & north and south
Dear Business Partner,

Based on the feedback we received from the professional audience, in 2015 Celje Fair has decided to merge related sectors which are the very foundation of the whole industry. International specialized quadruplet FORMA TOOL, PLAGKEM, GRAPH&PACK and FOUNDRY have been enhanced by WELDING AND FOUNDRY. The way we have paved a new way for large industrial trade shows FORMA TOOL, PLAGKEM, GRAPH&PACK and WELDING AND FOUNDRY

We would like the Celje Showground to become the most important crossroad for industrial sectors of the wider region in April of 2015.

Join 600 exhibitors and nearly 80,000 visitors who have the most important decision-making role in making visits to the whole company. The main reason for visit is a perfect match with the visit of their exhibitors (80.4%) satisfied with the visit of their exhibitors (75.5%) make a decision about attendance in 2015 already at the trade show in 2014. The majority (75.5%) made a decision about attendance in 2015 already at the trade show in 2014.

The main advantages of the trade shows are the location, professionalism and newly made contacts. The main advantages of the trade shows are the location, professionalism and newly made contacts.

We can only succeed with your help.

Yours sincerely,

Celje Fair Team
